

# Suzuki Micro Grand Piano GR-488

Good looks and hi-tech don't always go hand in hand but the Micro Grand Digital Piano is an amazing combination of performance, features and stunning appearance. This is perfectly portioned at 4 feet, and will add both warmth and charm to your personal environment. This piano comfortably fits any room size or décor.

The GR-488 is a complete entertainment center. It blends perfectly into today's modern living space and lifestyle with USB port connections, Bluetooth capabilities, and iPad connectivity.

Unlike traditional pianos that are exceptionally heavy and

require special handling and frequent tuning, the GR-488 Digital Micro Grand Piano is much simpler to manage—especially on a retail floor.

All that is required after the piano is setup is to plug it in. After that, the piano is self-demonstrating and requires no additional sales training or maintenance are needed.

Typically Grand Pianos, of this caliber, would retail anywhere from \$7500 to \$15,000. This Grand Piano is priced to sell and make you money. The manufacturer's suggested retail price is \$4,999, with a Minimum Advertised Price of \$3,999.
